

```
#include<stdio.h>

int main()
{
    int n,r,rev=0,temp;
    printf("Enter number:");
    scanf("%d",&n);
    temp=n;
    while(n!=0)
    {
        r=n%10;
        rev=rev*10+r;
        n=n/10;
    }
    if(temp==rev)
        printf("The given number is palindrome");
    else
        printf("Not palindrome");
    return 0;
}
```
